

Austin Jones

ADDRESS: 1004 Game Day Way Apt 201, Knoxville, TN PHONE: 615-962-3732

EMAIL: ajone239@vols.utk.edu – GITHUB: <https://github.com/ajone239>

Objective: Computer Engineering Senior looking for full time position for Jan 2022. Interested in working with Embedded Systems, Operating Systems, IoT, and Networking.

Skills

Working Knowledge: POSIX, Xilinx MPSoCs/FPGAs, Petalinux, Intel FPGAs, Visual Studio
Professional Languages: C++, C, C#, Python, Shell, VHDL
Recreational Languages: Rust, Haskell, BF, Groff
Office Skills: Excel, GIMP, Git, Visio, L^AT_EX, Markdown

Education

University of Tennessee Knoxville Anticipated Graduation: Dec 2021
Bachelor of Science in COMPUTER ENGINEERING GPA: 4.0/4.0

Current | **Engineering Professional Practice Office** - University of Tennessee
AUG 2019 | *Student Ambassador*
Assist UT engineering students to improve resumes, interview/inter-person skills, and overall professional skill. Work with other ambassadors to facilitate networking events and career fairs.

MAY 2019 | **Password Manager Browser Extension** - University of Tennessee
APR 2019 | *Data Structures and Algorithms Project*
Collaborated with a group of peers using Github to create a functional Chrome extension that manages a user's passwords for multiple sites.

- Parsed web pages to find password/username fields and stored users data in cloud.
- User data encrypted with the RC4 symmetric stream based encryption algorithm.

Work Experience

Current | **Siemens Molecular Imaging** - Knoxville
JAN 2019 | *Electrical R&D Intern*
Conduct projects, both individually and collaboratively, to provide value to the ER&D team:

- Presented findings from work to a large technical audience to demonstrate the validity of a new system architecture.
- Lead long term projects:
 - Utilize a Xilinx MPSoC to test limitations of ARM Core processing vs an FPGA implementation to assess cost reductions.
 - Used multiple Raspberry Pis with off the shelf networking hardware to conduct data path tests and compare the bandwidth with current custom solutions.
 - Work with a team of engineers using GitLab to write various driver code for a custom Linux image.
 - Developed Firmware, Embedded Software, and Application Software for a unit test fixture that is used during production of PET electronics.
 - Collaborated with a fellow intern to build a GUI Application that monitored and report the status of and entire system including all sub-assemblies.
- Update and maintain engineering documentation for various projects.
- Assist engineers with general tasks (e.g. wiring, testing, Python scripts to process files)

Scholarships and Honors

MAY 2019 | Gonzalez Family Awards for Outstanding Computer Engineering Junior
AUG 2019 - *Current* | S. T. Harris Scholarship
AUG 2019 - *Current* | Herschel C. & Louise Runnion Brand Engineering Scholarship

Interests and Hobbies

-
- Raspberry Pi, Arduino, Self-Hosting, IoT Projects
 - VolHacks, Custom Mechanical Keyboards, Basic Electrical Projects
 - Rock Climbing, Cooking, Specialty Coffee, Digital Art
